Art Unit: 1651

1. Receipt is acknowledged of the status letter filed January 16, 2004 and the second preliminary amendment filed October 23, 2003.

2. Claims 11-21 are now pending in this application.

Claims 1-10 have been cancelled.

3. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim 12, drawn to the first product, which is glycerol.

Group II, claim 13, drawn to a second product, which is sorbitol.

Group III, claim 13, drawn to a third product, which is mannitol.

Group IV, claim 11, drawn to the fourth product, which is sucrose.

Group V, claim 19, drawn to the fifth product which is a composition for topical application whereby an osmotically active substance is associated with a product that stimulates cell growth and the product is an extract of *Alchemilla vulgaris*.

In accordance with PCT rules, Applicant is entitled to the first product for examination in view of the prior art, which demonstrates that the products are not so linked as to form a single general inventive concept having a special technical feature.

If Applicant elected Group V, Applicant is required to elect a species for the active substance selected from Claim 11, that is, an election of one of the species selected from glycerol, sorbitol, mannitol or sucrose.

It is also noted that if Group V were elected, Applicant would be required to insert the process of making the extract or to insert the ingredients of the extracts to overcome

any enabling rejection. A suitable addition would be ----a hydroalcoholic---(-Alchemilla vulgaris extract) in accordance with example 3 and page 11 of the specification.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art, and the search required for one invention is not required for the other invention, thusly the restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined I-V and an election of species if Invention V is elected, even though the requirement be traversed (37 CFR 1.143).

6.
